

CONFIDENTIAL  
DIRECTOR OF CENTRAL INTELLIGENCE  
**Technology Transfer Intelligence Committee**

TTIC-C-054  
2 August 1982

MEMORANDUM FOR: Mr. Walter Elder  
NFIB Executive Secretary

SUBJECT: Use of Contract Employees

REFERENCE: Your IC/82/5542, dated 29 July 1982, Same Subject

1. We have not seen the cited request for having contract employees of Sandia, Los Alamos, and Lawrence Livermore Labs serve on DCI Committees. My own view is that representatives from Energy intelligence should serve on NFIC/NFIB Committees and their subcommittees, and that is the situation regarding TTIC. This avoids any difficulties regarding sensitive or proprietary information. [redacted]

25X1

2. On the other hand, we very much welcome the technical expertise and analysis provided to us from the National Laboratories. For example, experts from Lawrence Livermore and Los Alamos often provide very helpful contributions that are used in the review of prospective exchange programs by the Committee on Exchanges (COMEX) and in the review of export cases by the Export Control Committee (EXCON). On various occasions, fully-cleared specialists from the Labs have participated in working group activities of these two TTIC Subcommittees. [redacted]

25X1

3. An official from Los Alamos currently serves as an alternate Energy member of a TTIC Collection Guidance Working Group, and another Los Alamos employee serves as the Energy member of a Data Base Working Group (with an Energy headquarters person serving as alternate). In the latter case, Los Alamos is developing automated data bases of interest to TTIC, and we benefit from their participation. [redacted]
